

Application Guide

Colourcoats paints are either a matt or satin finish avoiding the excessive drying times and difficulties in getting an even coat when working with gloss paints. This also means Colourcoats is very quick drying for application of multiple coats/ varnishes.

Colourcoats is also highly opaque meaning that a single coat is often sufficient coverage. It can be sprayed with a suitable airbrush or brush painted. When brush painting multiple thinned coats are recommended with sable brushes.

For best results we recommend using with Colourcoats thinners.

Solid pigments will tend to separate from the carrier solvent if sat still for long periods of time, so we strongly recommend thorough mixing before use.
